The Art of Software Development

A Comprehensive Real Estate Management Solution

Key Information

Industry:
Real Estate marketplace

Project duration:
3.5 years

Team Size:
10 specialists

Technologies:

- Spring Integration
- Apache Wicket
- Hibernate
- Hibernate Search
- ActiveMQ
- Salesforce
- HTML, CSS, jQuery
- Amazon Cloud

Services:

- Architecture and design
- Implementation
- Testing
- Deployment
- Maintenance

Highlights

- Real estate marketplace for Northern European countries, designed to manage a **high volume of properties and transactions**.

- **Data transfer system** was built to import and update the information related with the real estate properties, from various realtors. The data transfer system accepted many formats and identified possible duplicates in the lists.

- The project delivered a **robust and scalable architecture**, advanced search functionalities, a user-friendly interface, **secure payment processing**, reports, and seamless integration with mapping services.

- The platform was successfully delivered on time and within the allocated budget, **meeting all project requirements**.
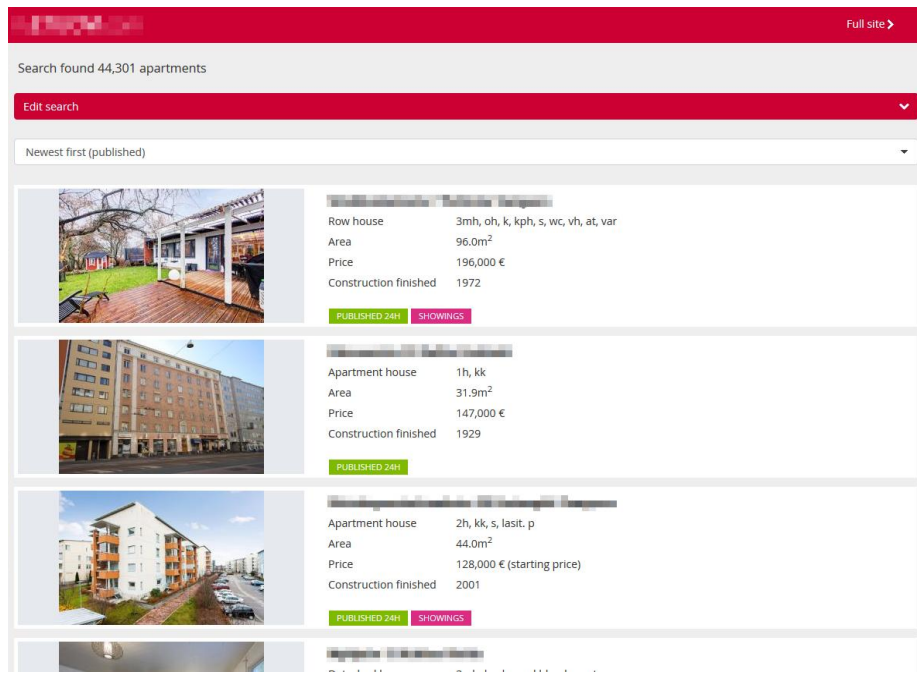

ArtSoft consult

Product Overview

This project involved the development of a comprehensive online platform designed to **facilitate real estate transactions**.

The platform aimed to provide a seamless experience for both buyers and sellers, offering a range of features, from property listings to **advanced search functionalities**.

Requirements

The project requirements included creating a comprehensive database of real estate listings, developing a user-friendly interface for property searches and listings, integrating with payment gateways for secure transactions, implementing advanced search functionalities, providing analytics and market insights to users, and ensuring **high availability and scalability of the platform**.

ArtSoft consult

Provided Solution

The project delivered a **robust and scalable architecture**, advanced search functionalities, a user-friendly interface, secure payment processing, and seamless integration with mapping services, resulting in **increased user engagement**, **improved user experience**, enhanced market insights, and the ability to handle **increased traffic and data volumes** without compromising performance.

" Client Words

"I have had a pleasure to work with ArtSoft since 2009 in several software development projects as customer's project director and primary contact person roles. My company and its affiliated companies started outsourcing partnership with ArtSoft on small pilot project. After the pilot project ArtSoft has shown great qualities that have led to a partnership. [...] I recommend them with enthusiasm as a long-term outsourcing partner."
